

October 31, 1949.

Dr. A. P. Krueger,
Department of Bacteriology,
University of California,
Berkeley 4, California.

Dear Dr. Krueger:

I have just written Dean Strong a letter accepting the appointment for the 2d Summer Session in your department, provided I get leave of absence here [which should not be difficult]. I am looking forward to it very optimistically.

May I express my thanks for the particular and unusual celerity with which you have handled this matter, which has been very helpful to me in formulating plans.

I will communicate with you in the Spring about necessary details.

Yours sincerely,

Joshua Lederberg.
